Define CS, fit into CC

1. CUSTOMER SEGMENT(S)

CS

Who is your customer?
i.e. working parents of 0-5 y.o. kids

Energy analysts, researchers, students, policy professionals and decision-makers who need to compare fuel prices and taxation across countries and regions.

6. CUSTOMER CONSTRAINTS

CC

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

- Large datasets are difficult to interpret manually.
- Limited time or data-analysis skills.
- Comparisons need consistent measures and filters.
- Findings depend on dataset coverage and quality.

5. AVAILABLE SOLUTIONS

AS

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

- Raw CSV or spreadsheet review
- Government and energy reports
- Separate country-level price websites
- Manual charts and calculations

These can take time and may not offer one combined comparison.

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS

J&P

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

- Compare petrol, diesel and LPG prices between countries.
- Understand yearly fuel-price movements.
- Examine regional tax differences.
- Identify nations with high tax percentages.
- Compare selected countries using common measures.

9. PROBLEM ROOT CAUSE

RC

What is the real reason that this problem exists?
What is the back story behind the need to do this job?
i.e. customers have to do it because of the change in regulations.

Fuel-price and tax information is spread across many records and locations. Differences in country, region, year and fuel type make direct comparison difficult without a consolidated visual view.

7. BEHAVIOUR

BE

What does your customer do to address the problem and get the job done?
i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

Users collect fuel-price data, filter records by country or year, compare values in spreadsheets or reports, inspect charts and look for trends before drawing conclusions.

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS

TR

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

- Changes in fuel prices
- Interest in fuel taxation
- Need for country or regional comparison
- Academic research or project work
- Policy and business analysis

4. EMOTIONS: BEFORE / AFTER

EM

How do customers feel when they face a problem or a job and afterwards?
i.e. lost, insecure > confident, in control - use it in your communication strategy & design.

Before: Confused by scattered data and time-consuming comparisons.

After: Better understanding of trends, country differences and tax patterns through clear visualizations.

10. YOUR SOLUTION

SL

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.

A Tableau Public dashboard and Story using the global fuel prices CSV. It includes four KPI cards, petrol/diesel maps, yearly fuel and Brent crude trends, regional tax comparison, top-five tax nations and a Canada–Mexico–US comparison.

8. CHANNELS of BEHAVIOUR

CH

8.1 ONLINE

What kind of actions do customers take online? Extract online channels from #7

ONLINE:
- Tableau Public dashboard/story
- CSV dataset and online reports
- Web browser for exploration

OFFLINE:
- Classroom/project presentation
- Discussion of charts and findings
- Report or exported screenshots

8.2 OFFLINE

What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

Extract online & offline CH of BE
